

## **The Kingdom Business Project**

### **Executive Summary**

For the past five years the Holy Spirit has been moving in dramatic fashion in some of the most restricted nations on earth. Countries like Afghanistan, Iran, Saudi Arabia, and six others in the region are experiencing people becoming Jesus followers and starting churches in unprecedented numbers.

The catalyst for this underground movement is business--specifically micro-business.

The Kingdom Business Project, founded by RUN Ministries, is based on two value propositions:

1. When we empower someone with a profitable, sustainable business, we free them from terror, give them hope for the future, and an ability to support their family.
2. Successful businesses in a community create a platform for local church growth.

What makes The Kingdom Business Project even more miraculous is the local leadership. All of the leaders in each country are Muslim background believers from radicalized networks whose mission was to destroy Christianity, America, and Israel. Many of them have come to faith through dreams and visions of Jesus, and all have been discipled, baptized, and taught God's word through underground house churches.

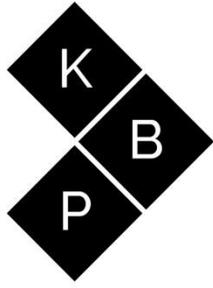

The key leaders in each country have been through a five year training process solidifying their faith, character and leadership abilities. The leadership skill development, peer accountability and growth structures are all modeled after their former terrorist cell experience. The top national leaders are a part of an "International Council" and work collaboratively to monitor progress, maintain performance standards, and perpetuate successful management processes throughout all levels of the organization.

The heart of The Kingdom Business Project is the Seed Team. This is a group of five business owners/church planters who go into one of these remote villages and start businesses. They build relationships with people, share the gospel, and establish churches. Business profits fund church growth, and a new Seed Team that repeats the process in another locale. The initial investment to sponsor a Seed Team is \$20,000US.

Kingdom Business Project is the first phase of an "End to End" strategy to reach all of the Unreached Unengaged People Groups (UUPG) in these countries. In cooperation with the Jesus Film and several bible translation organizations, our aim is to bring the Gospel message to millions of people who have never had the opportunity to hear.

After five years of testing, the business model has been thoroughly proven. The strategic growth plan, impact on families and villages in difficult locales, growth of the local church and community of faith, and the financial engine that drives the project are a compelling narrative.

We invite you to join with us.
